### Møde den 27. maj kl 10.15 til 12.00 i møderum 1671-234

#### 1. Approval of agenda and minutes

Dato: 27. maj 2015

Approved.

Side 1/2

#### 2. Any news on upcoming applications/projects?

The Niels Bohr Group has made a research application on platinum group element with a Norwegian partner.

MSS is co-applicant of a major application for the Villum Jubilee Fund.

#### 3. Move the publication area in 1672-1 to coffee room?

Accepted. CL will ask program administrator Lara O'Dwyer if she will help organise an exhibition of Geoscience materials/history. LK can help organise the practicalities.

#### 4. Strategy update SWOT analysis

Five strengths from the dean's visit:

1. Is og klima (Jan Piotrowski,)
2. Vand og miljø (Jan Piotrowski)
3. Den dybe jord (Niels Balling)
4. Energi – fossil og geotermisk (Niels Balling)
5. Geochronology (Andrew Murray)

There was a debate on of we should have focus on what kind of research do we do, and then look into what infrastructure supports is, such as geochronology and modeling. Our infrastructure gives us the strengths to exactly focus on the science.

For the strategy the above names in brackets were asked to produce texts of 10-15 lines. They were encouraged to look into the old strategy for inspiration.

A deadline needs to be set for this task.

## 5. AOB

Side 2/2

---

The department will host a “Karen Luise Knudsen seminar” with international participation in connection with her honorary doctorate at Lund University 29 May 2015. The seminar will take place in the autumn of 2015.

Scientific coordinator: CL and JJP are going to make an outline of a job description to be sent to SBN asap.
